Design features...

Formosa Fountains specializes in creating fountains that enhance the surrounding environment. Features and techniques used in our fountains include:

- ? Geyser effects
- ? Jumping jets
- ? Dry deck
- ? Waterfall effects
- ? Lighting effects
- ? Musical choreography
- ? Motion sensory effects
- ? Fire enhancements

These features are used to obtain the exact texture of the water, and aesthetic appeal to compliment and create the surrounding area.

Behind the scenes...

Much of what makes the beauty of a fountain is never seen. Many design features that make the fountain blend into an area flawlessly are the result of sound engineering, that includes:

- ? Water filtration
- ? Advanced plumbing systems
- ? Advanced electrical systems
- ? Landscape architecture integration
- ? Aesthetic consultation
- ? Safety and health provisions

Our services...

Formosa Fountains provides total solutions for all large and industrial water fountains. We believe in helping the customer to not only create a beautiful landmark, but to also ensure ongoing success in all design phases. Our services include:

- ? Design development
- ? Construction document packages
- ? Construction support
