

Formosa Fountain & Engineering Company

Selected Projects & References

600 Anton, Costa Mesa (1990)

Materials: Stainless Steel, Concrete, Rock.

Dimensions:

Each pool is 25' diameter and spaced 60' apart (center to center).

Located in the "Town Center Park" in Costa Mesa, California, this innovative take on a reflecting pool concept uses stainless steel walls, alternating pools and overflow rings.

The equipment for this fountain is housed in the parking garage directly across from the Plaza Tower building. Special care was taken to hide all fountain fittings and lighting.
